

PRODUCT RANGE

GALLAGHER AGGREGATES LTD

Gallagher Aggregates Ltd operates two quarries in Kent: Hermitage Quarry, near Maidstone, and Blaise Farm Quarry in West Malling, which have the capability to produce in excess of 1 million tonnes of primary and recycled aggregate per annum, supplying more than 70 different construction material products.

AGGREGATES

Gallagher Aggregates is the only supplier of indigenous crushed limestone rock materials in the South East. We are accredited with BSI for aggregates covering BS EN 12620, BS EN 13242 and BS EN 13043. We can supply:

- Single size drainage aggregates
- Concrete and asphalt aggregates
- Gabion stone
- Granular sub bases
- Crushed rock fines and sands
- General fill materials

READY MIX CONCRETE (from Maidstone and Ashford)

We supply concrete from our Hermitage Quarry in Maidstone and our plant in Ashford, supplying a wide range of concrete mixes and floor screeds. All mixes are manufactured to BS EN 206 and BS 8500 and are fully BSI Quality Accredited. The following are some of the products we are able to supply:

- All general purpose construction concrete mixes
- Foamed concrete
- Fibre reinforced concrete
- Waterproof concrete
- A full range of admixtures

FLOWING SCREED

Gallaflo is Gallagher's range of high quality self compacting cement based liquid screeds for use in domestic and commercial projects. It complies with BS EN 13813.

Gallaflo is a cost effective alternative to traditional sand cement screeds. It can be laid as thinly as 25mm, and with high thermal conductivity it lends itself perfectly to underfloor heating areas. It is easy to install, quick drying and can be walked on in just 24 hours.

RECYCLING AND INERT LANDFILL

We operate a fully permitted recycling and landfill operation. We are the county's leading supplier of recycled products which have been derived from imported materials such as construction demolition materials, asphalt and tarmacadam spoil and utility arisings. Products include:

- Recycled aggregates and Sub Base Type 1
- Crushed concrete and fills
- Screened soils and manufactured aggregates

HBM (hydraulically bound mixtures) AND RCC (roller compacted concrete)

We supply a range of HBM and RCC products which are produced on our Rapidmix 400 tonnes per hour, fully mobile plant. The products are mixed using our own crushed rock and recycled material and mixed with a low carbon cement binder. The range of material uses include:

- Stabilisation of soils
- Road capping and sub base layers
- Asphalt base and binder course alternatives

KENTISH RAGSTONE MASONRY

Gallagher Aggregates is the only company still quarrying Kentish Ragstone, the most widespread building stone used throughout the South East of England.

With our bespoke masonry machinery and skilled, experienced staff we are able to supply stone for repairs to historical buildings, thus ensuring that the repairs blend in with traditional Kentish Ragstone. We also supply stone for new build projects, upholding and maintaining the unique local character of southern England's historic architecture.
